

ACKNOWLEDGEMENTS

This entire effort would not have been realized without the help and support of many people. Therefore, I would like to acknowledge each and everyone. This research was both an adventure and a challenge and the contributions of the following people are duly appreciated.

First, and foremost, I am very grateful to Prof. Kalle Lyytinen for his proactive supervision of my research work, effective guiding in writing scientific papers, insightful comments, continuous encouragement, and extensive assistance. His profound understanding of scientific research and decisive guidance has allowed me the possibility to publish several scientific papers on IT-supported technology transfer in leading scientific conferences, books, and journal as well as allowed me to complete my Licentiate thesis in March 2000. He has always been available whenever I have needed any support. His encouraging attitude helped me keep the objectives of this study clear in my mind. All the aforementioned publications have been incorporated in this thesis.

I would also like to thank Prof. Vesa Savolainen for his supervision, support and encouragement in my research, for sharing his knowledge and experience on scientific writing and publications, and collaborating in the publishing of scientific papers. My special thanks to Prof. Eero Peltola for his valuable comments, encouragement and support offered during the early stages of this research. I sincerely appreciate his competent advice and support.

I am also very thankful to the examiners of my Licentiate and Ph.D. theses, Prof. Nitya L. Karmakar (Information Systems Group, University of Western Sydney, Australia) and Dr. Mikko Korpela (Dept. of Computer Science and Applied Mathematics, University of Kuopio, Finland) for their time and assistance. Their insightful comments on the earlier versions of both my Licentiate and Ph.D. theses proved very useful. I sincerely appreciate their participation in this scientific endeavor. I would like to sincerely thank Prof. Nitya L. Karmakar and Prof. Veikko Seppänen (Dept. of Information Processing Science, University of Oulu, Finland) for being my opponents.

The thesis has greatly benefited from extensive peer reviews of Prof. Seppo Puuronen, Prof. P. S. Deo and Prof. K. Ramanathan as well as other researchers such as Mr. Najmul Huda, Dr. H. J. Steenhuis, Dr. Kai A. Simon and Mr. Pouya Pourkomeylia. Additional comments made by several reviewers of different scientific forums, which have contributed to the quality of this study are also very much appreciated.

My special thanks go to Prof. Seppo Puuronen and Prof. Timo Käkölä for their critical and constructive comments and valuable advice. I thank Prof. Zuhair Al-Obidi who has done extensive research on technology transfer and was available for interview. I also thank Prof. Zuhair Al-Obaidi, Mr. Najmul Huda and Prof. Jaak Tepandi for their collaboration in the publishing of scientific papers.

I extend my particular thanks to the *Valmet Service Technology Division* members - Mr. Reijo Louna, Mr. Reijo Seijesvirta, Ms. Anne Rantanen, Mr. Simo Nivala, Mr. Henrik Bergendahl, Mr. Mauri Rukajarvi and Mr. Sombat Clinsuittho; *KONE Corporation* members - Mr. Matti Eskola, Mr. Pekka Sipila, Mr. Kari Malmström, Mr. Pekka Kivi, Mr. Jussi Nissi, Ms. Juvala Thua and Mr. P. Gurumoorthy; *FORTUM Power Engineering Division* and *FORTUM Operation and Maintenance Division* members - Mr. Olli Immonen, Mr. Markku Hangasjärvi, Ms. Paula Wilander-Prajogo, Mr. Matti Turunen, Mr. Mauri Varis, Mr. Erkki Päivärinta and Mr. Petri Kouvo, who all participated in this project acting as essential informants for the empirical part of the study allowing me to conduct in-depth investigations. I deeply appreciate their contributions as well as other employees' help of those case companies; for their friendly cooperation, time and interest given to my research project. I also thank them for their careful review of the case study analysis reports.

In addition, I would like to thank the interviewees for the pilot case company. Unfortunately, to ensure data confidentiality, they have to remain anonymous. In 1992, the technology transfer project manager of the pilot case company introduced to me the information technology supported technology transfer phenomenon. I am thankful to him and his associates for allowing me to conduct several interviews.

I would also like to extend my thanks to all the scholars, academics, business researchers and corporate persons around the world who took part in this study via e-mail, Web conferencing, Internet discussion groups, telephone, fax and face-to-face meetings. I would also like to thank the many people that I have interviewed since 1992, including people involved in information technology supported globalization of enterprises through technology transfer.

The COMAS graduate school at the University of Jyväskylä from 1997 to 2000 has funded this research. In 2001, it provided various means of assistance; and I am thankful for its valuable support. Also thanks to the Department of Computer Science and Information Systems of Jyväskylä University for the financial and material support.

I am also thankful to Rector Aino Sallinen, for the scholarship that I was awarded in 1997 for the performance of my Ph.D. research study, and for her encouragement and support.

Due to their support, cooperation and provision of a favorable research environment during the research process, I wish to thank the following people: Prof. Markku Sakkinen, Prof. Jukka Heikkilä (Vice Dean), Prof. Jari Veijalainen, Prof. & Dean Timo Tiihonen, Prof. Pasi Tyrväinen (Head of the Dept.), Mrs. Leena Kirkkomäki, Mr. Esa Auramäki, Dr. Tapani Ristaniemi, Prof. Pekka Orponen, Prof. Mike Robinson, Dr. Eija Karsten, lecturer Mauri Leppänen, lecturer Pertti Hirvonen, lecturer Jorma Kyppö, Dr. Minna Koskinen, lecturer Eleni Berki, lecturer Eero Tourunen, lecturer Pekka Makkonen, Dr. Jussi Koskinen, Prof. Sergey Muravyov, Dr. Vagan Terziyan, Dr. Helen Kaikova, as well as staff members: Mrs.

Mirja Tervo, Mrs. Kaarina Suonia, Ms. Elina Isännäinen, Mrs. Maarit Kinnunen, Ms. Johanna Savela, Mrs. Essi Laine, Mr. Tapio Tammi, Mr. Jouko Kääriäinen, Mrs. Tarja Vänskä-Kauhanen, Mr. Pekka Olsbo, Mrs. Marja-Leena Tynkkynen, Ms. Sanna Hirvola, Ms. Terhi Järvenpää, Mr. Kari Niemi, Mr. Kari Kivelä and Mr. Tero Vartiainen, the majority of them based at the Department of Computer Science and Information Systems at Jyväskylä University.

I am also thankful to my colleagues Zhang Zheyang, Anja Mursu, You Yu, Piotr Krawczyk, Vladislav Fomin, Jouni Huotari, Alexander Seleznyov, Vladimir Ryabov and Alexey Tsymbal for their comments.

I would also like to extend my particular thanks to my parents, brothers and sisters for their inspiration and support. It is needless to say that during this research my mother's severe illness, brother's and sister's sudden deaths strained me and the other members of my family a lot. However, the continuous encouragement from all my family members has helped me to overcome the pain - I deeply appreciate that.

And finally, I would like to thank Prof. Kalle Lyytinen and all the others who welcomed me at the Department of Computer Science and Information Systems, gave me the opportunity to undertake this research, arranged the financial resources and guided me in every step of the research process. Without their great assistance, I would not have been able to pursue this research.

Nazmun Nahar
